ParkHub.com and WirelessCarpark.com Join Forces to Benefit the Parking Industry and Event Parking

The partnership between ParkHub and WirelessCarpark offers enhanced service and convenience to event parkers and parking providers across the county.

Plainville, CT: February 22, 2012

WirelessCarpark.com (WCP) a premier provider of cloud-based revenue control for event parking is pleased to announce their newly formed partnership with ParkHub.com, an online reservations service which allows patrons to find and purchase a parking space prior to leaving for their event. Under the terms of the agreement, WirelessCarpark and ParkHub will provide interface capabilities to their respective software applications to accommodate and enhance each other's product offering. The outcome of the integration and partnership will benefit users of both systems.

Event patrons can plan, select and purchase the location they want to park ahead of time; allowing these parkers to enjoy a carefree parking experience the day of their event. Parking companies and venues that accept ParkHub's reservations will gain the revenue control, auditing power and accurate reporting provided by the WCP system. Parking companies that use both systems will be able to automatically enforce pass acceptance. WirelessCarpark users will acquire another avenue to enhance customer service through ParkHub's reservation system. WCP users also benefit from the revenue opportunity associated with ParkHub's online reservation service.

John Beyer, President of WirelessCarpark.com states, "We are extremely excited about the new opportunities our partnership with ParkHub presents to clients and event patrons. The interface between WCP's revenue control technology and ParkHub's online reservation service allows parking companies and their clients to capitalize on the experience, functionality, and focus each company specializes in."

"When fans begin to utilize our service and reserve their parking spaces in advance, a lot of chaos is alleviated. Users know right where to go and are assured a convenient parking space; improving their overall experience. Parking companies and venues using our service and WCP's technology will achieve stricter control and audit capabilities" says George Baker, Founder and President of ParkHub.com.

The relationship between WirelessCarpark and ParkHub originated to bolster functionality across the two product lines to fulfill the growing needs and increased expectations of the parking industry. Both WCP and ParkHub are progressive technology companies with an eye on the future; making the partnership a natural step towards innovation and growth.
