

## WirelessCarpark.com and ProPark Prove to be “Game Changers” in the NFL’s Oakland Raiders Home Opener at O.co Coliseum

**New Technology allows game patrons the speed and ease of paying by credit card or cash for game day event parking.**

Plainville, CT (PRWEB) September 30, 2011

Today, WirelessCarpark.com (WCP) announced the successful deployment of their mobile event parking system at the Oakland Raiders home opener game against the New York Jets. The WCP system is designed to run on Intermec’s rugged CN50 mobile computers and PB21 mobile printers. The system of 30 handhelds and printers was used by Propark America’s O.co Coliseum parking team. The WCP revenue control system quickly processed cash and credit card parking transactions while tracking vehicle ingress over (in this instance) cellular communication.

Event Parking at o.co Coliseum using  
WirelessCarpark.com

WirelessCarpark.com’s System provides revenue control and global reporting for flat-rate parking operations. Utilizing cloud-computing technology, the WCP system is licensed by device not location. The system does not require a local server or expensive communication infrastructure; helping keep costs down. WCP’s architecture and design allowed Propark to utilize multiple WCP devices that were previously implemented at other Propark locations. The transfer of licensed devices enabled Propark to increase their coverage at O.co Coliseum, without paying for additional hardware, infrastructure or licensing fees.

“ We are excited to work with WirelessCarpark.com and ProPark to offer more options to guests attending our event...another example of how we are looking to provide our guests with the best experience possible here at our facilities. ”

Interim General Manager Ron Little stated; “We are excited to work with WirelessCarpark.com and Pro-park to offer more options to guests attending our events. Now, when you arrive at an Oracle Arena or O.co Coliseum event, you can pay your parking fee with Visa, MasterCard, American Express or Discover. This allows for a quicker transaction at the gate, alleviating some of the traffic congestion that naturally happens as guests wait to pay for parking. We are happy to be able to provide this service as another example of how we are looking to provide our guests with the best experience possible here at our facilities.”

### About Wireless Carpark

Headquartered in Plainville, CT, Wireless Carpark utilizes a combination of premier hardware and cloud-computing technology to provide affordable automated revenue control to the parking industry.
